Seamless Kiosk
Identity Management

Vision-Box's Seamless Kiosk is a fully integrated multi-context identity management solution engineered to meet the challenges of the modern citizen services environment.

The new generation Seamless Kiosk puts forward fast, proactive user-centric adjustments, a best-in-class experience through smart machine learning and future-proof ergonomics, and automatic adjustment to each user profile.

This robust integrated unit is ready for intensive use in any identity management context. The high quality of the captured data (face, fingerprint and signature) reduces errors caused by manual procedures. The kiosk minimizes biometric inconsistency (pose, face expression, etc.) and uses an automatic face tracking camera to adjust for a perfect face image capture in compliance with ICAO 9303 document specifications.

The kiosk is provided with an SDK for easy integration with any environment and network, making it a powerful cost saving and time effective option.

Integrated device:

- Large size instructional display
- Face capture module with automatic height adjustment, adaptive lighting and liveness detection
- 2 Single-fingerprint scanners
- Signature pad
- SDK integration with identity management authorities' systems

Compliance at its core

High quality ICAO 9303 compliant biometrics:
- Full-frontal face image
- Fingerprint
- Signature

Accessible by design, compliant with :
- Americans with Disabilities Act (ADA)
- Canadian Standards Association (CSA)
- European Accessibility Act (EAA)
