

Seamless Kit

The Biometric Retrofit Solution:

From baggage drop and security screenings to lounge access and boarding, our state-of-the-art system provides a seamless upgrade that optimises the passenger experience through cutting-edge biometric technology.

The **Seamless Kit** is an identification touchpoint that serves the traveller through a seamless journey. Ideal for secure, quick and accurate identity vetting. The Seamless Kit uses digital credentials to replace passports, ID cards, or any form of paper or digital access tokens. By integrating with legacy systems, it stands as the retrofit of any existing equipment that does not allow facial recognition.

From bag drop and security to lounge access and boarding, the Seamless Kit can help multiple use cases, as well as their stakeholders, by complementing a transaction clearance station with a simple design and high efficiency. Compact, lightweight design with full functionality: the Seamless Kit fits any desk and can be attached to any wall or device.

Liveness Detection

Flexible and Adaptable Position

An Integrated solution

The Seamless Kit integrates with Vision-Box Seamless Journey Platform taking advantage of its business process orchestration features, such as the business rules management, remote real-time monitoring with the transaction monitoring application, integration with external border management systems and watchlists, data security and privacy.

Vision-Box Facial Recognition (FR)

The Vision-Box Facial Recognition (FR) engine is built on an algorithm which is agnostic and compliant with all required references and is continuously evaluated by NIST (National Institute of Standards and Technology). Operational reality requires agile systems and engines capable of answering different business cases. This is only achieved through experience in real environments and the subsequent development of a proper implementation methodology.
