

Environmental Policy

Commitment

Vision-Box works on commercialization, design and development, production, marketing, deployment and technical support of products for biometric identity management and security by intelligent video surveillance.

Throughout its experience, it has been committed to technical and organizational excellence, in order to fulfill all requirements, including the protection of the environment and the preservation of natural resources.

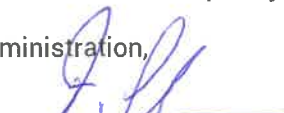

We assume the commitment, shared with our employees and partners, of complying with applicable legislation and the requirements of the ISO 14001 standard, continually pursuing the introduction of improvements to improve our environmental performance.

Principles

We accept responsibility for the harmful effects that our operations have on both the local and global environment and we are committed to carry out all reasonably practicable measures to continually improve our environmental performance. We will achieve this through our commitment to:

- Integrate the consideration of environmental concerns and impacts into our decision making and activities.
- Comply with all applicable environmental regulations.
- Reduce the amount of waste produced and reuse as much as possible.
- Actively promote recycling both internally and amongst our customers and suppliers.
- Reduce energy and water consumption within our buildings and processes in order to conserve supplies and minimise the consumption of natural resources.
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner.
- Continually improve over time by striving to measure our environmental impacts and by setting goals to reduce these impacts each year.
- Avoid unnecessary use of hazardous materials and products, seek substitutions when feasible, and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed.
- Minimize the social impact and damage of activities by periodically reviewing our environmental policy in light of our current and planned future activities.

The Administration,

Miguel Leitmann (CEO)
